

STAND-BY SERVICE

Where auxiliary or breakdown service is provided by the Cooperative or where an emergency source of supply is provided by the member, a double throw switch must be used to prevent possible injury to the Cooperative workmen by making it impossible for power to be fed back into the main line from the generator.

If the member desires to use the Cooperative's service as auxiliary to another source, he may do so only under a contract which provides for the payment of fixed charges per kilowatt of demand for as many kilowatts as it is possible for him to use on the service at any one time, which shall be definitely determined and specified. The demand specified shall be limited by a circuit breaker so arranged as to disconnect the service if the number of kilowatts specified is exceeded.

ELECTRICITY PURCHASED BY THE COOPERATIVE OR ODEC

Cogeneration and small power production facilities which meet Federal qualifying standards may elect to sell energy to the Cooperative or ODEC. The Cooperative will purchase energy under Rate Schedule Q~~facilitate the purchase of energy for ODEC under Rate Schedule X—Cogeneration and Small Power Production,~~ from qualifying facilities having maximum generation of 1000 kW or less. Purchases from qualifying facilities, which generate more than 1000 kW, will be made under special contracts in accordance with PURPA.~~In either event, the rates paid by the Cooperative will not be less than those stated in Rate Schedule X.~~ The terms and conditions of purchase will vary with the circumstances of each installation.
